EIA Reporting Assistance

Let NMPP's staff lighten your work load...

NMPP's staff of professionals assist several member utilities with their reporting requirements to the U.S. Energy Information Administration (EIA).

Annually, the EIA requires electric utilities to complete various reports for independent analysis and dissemination to help promote sound policymaking, efficient markets and increased public understanding of energy and its interaction with the economy and environment.

The reporting process can be complicated and time-consuming – especially for small utilities with minimal staff. Let NMPP's staff of experts lighten your work load.

NMPP's staff performs this work at non-profit, cost-based pricing for its member municipalities and utilities. NMPP also provides ongoing assistance – any follow up from the EIA is also filtered through NMPP to further assist its members.

Reports We Do

EIA 860 (Annual Electric Generator Report) – Form EIA-860 collects generator-level specific information about existing and planned generators and associated environmental equipment at electric power plants with one megawatt or more of combined nameplate capacity.

EIA 861 (Annual Electric Power Industry Report) – Form EIA-861 and Form EIA-861S (Short Form) data files include information such as peak load, generation, electric purchases, sales, revenues, customer counts and demand-side management programs, green pricing and net metering programs and distributed generation capacity.

EIA 923 (Annual Power Plant Operations Report) – Form EIA-923 collects detailed electric power data – monthly and annually – on electricity generation, fuel consumption, fossil fuel stocks and receipts at the power plant and prime mover level.

Did you know?
NMPP staff currently
completes 43 reports
for 22 member utilities
